Serie R

MODEL No 1 BLACK

Composition: 60% merinwool, 40% polypropylenelipropylen (POLYCOLON®)

LINING: membrane-polypropylene

MODEL No 2 BLACK

Composition: 50% merinwool, 50% akrylic

LINING: membrane-polypropylene

MODEL No 3 GRAPHITE

Composition: 100% acrylic

LINING: membrane-polypropylene

MODEL No 4 BLACK, GRAPHITE

Composition: 100% acrylic

LINING: polyester

Serie R

MODEL No 5 BLACK, GRAPHITE, WHITE

Composition: 100% acrylic

MODEL No 6 BLACK

Composition: 50% merinwool, 50% akrylic

LINING: polyester 100% MIKROPOLAR

MODEL No 7 PINK, BLUE

Composition: 100% acrylic

LINING: polyester 100% MIKROPOLAR

MODEL No 8 BLACK

Composition: 100% acrylic

LINING: polyester 100% MIKROPOLAR

Serie R MODEL No 9 BLACK
Composition: 50% merinwool, 50% akrylic
LINING: polyester 100% MIKROPOLAR

Serie G MODEL No 1 BLACK, GRAPHITE
Composition: 100% acrylic

Serie G MODEL No 2 BLACK, GRAPHITE
Composition: 100% acrylic

Serie G MODEL No 3 BLACK, WHITE
Composition: 100% acrylic

Serie G

MODEL No 5 BLACK, GRAPHITE, WHITE

Composition: 100% acrylic

MODEL No 6 BLACK

Composition: 100% acrylic

MODEL No 7 BLACK, GREY

Composition: 100% acrylic

MODEL No 8 BLACK, GRAPHITE

Composition: 100% acrylic

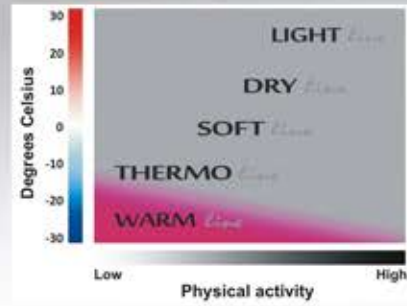

GWINNER WARM line

Double-layer fabric ideal for winter. It keeps the body at an optimum temperature, even on very cold days. It dries quickly, efficiently dispersing sweat to the outer layers of clothing. The "brushed" inner surface makes the underwear, though fully synthetic, delicate and pleasant to the skin, similar to cotton. We use this fabric with anti-bacterial silver ions (SILVER + Rudolf GmbH certificate), for chosen articles, the material inhibits the growth of bacteria and prevents bad odours. The fabric's structure provides adequate stretchability. Combined with flat seam technology, it provides the necessary flexibility, perfect fit to the body and prevents the chafing of the skin and the overlapping of seams in the next layers of clothing.

COMPOSITION: 95% polyester, 5% elastane

WEIGHT: 225g/m²

DESCRIPTION: Moisture transport, Quickly dry, Thermobuffering, Easy care, Brushed, Perfect Fit, Two way stretch.

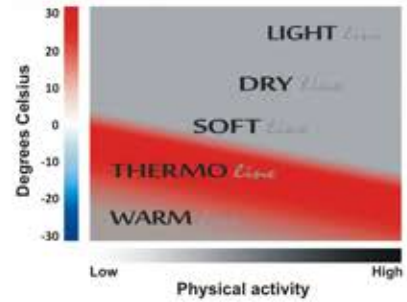

GWINNER THERMO line

A lighter version of the WARMline fabric, double-layer, ideal for the transitional and winter period. It provides warmth during the cold. It dries quickly, efficiently dispersing sweat to the outer layers of clothing. The "brushed" inner surface makes the underwear, though fully synthetic, delicate and pleasant to the skin, similar to cotton. With anti-bacterial silver ions (SILVER + Rudolf GmbH certificate), the fabric inhibits the growth of bacteria and prevents bad odours. The fabric's structure provides adequate stretchability. Combined with flat seam technology, it provides the necessary flexibility, perfect fit to the body and prevents the chafing of the skin and the overlapping of seams in the next layers of clothing.

COMPOSITION: 95% polyester, 5% elastane

WEIGHT: 170g/m²

DESCRIPTION: Moisture transport, Quickly dry, Thermobuffering Easy care, Brushed, Perfect Fit, Two way stretch.

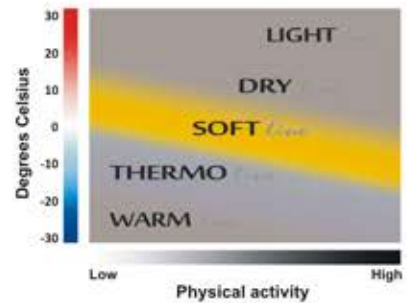

GWINNER SOFT line

Extremely pleasant to the touch, this fabric is made from extremely soft polyamide micro fibres. It is as comfortable as a second skin. Products made of SOFTline fabric are suitable for all forms of active recreation and increased effort. Due to their unique properties, they are perfect for use in high quality products. The materials used guarantee colour durability and abrasion resistance.

COMPOSITION: 80% polyamide, 20% elastane

WEIGHT: 190g/m²

DESCRIPTION: Moisture transport, Quickly dry, Air-permeability, Easy care, Brushed Perfect Fit, Two way stretch.

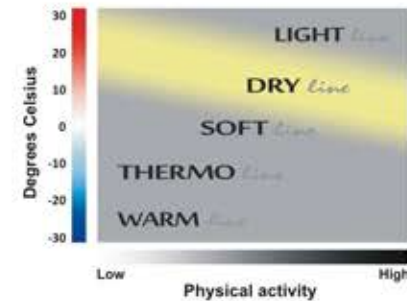

GWINNER DRY line

Thermal underwear made of DRYline fabric is ideal to wear throughout the year. It works both in summer and winter, especially in sports. It maintains optimum body temperature, providing exceptional thermal comfort at any temperature. The unique structure of the fabric is subjected to further TANA-FINISCH treatment causing a significant increase in moisture dispersion and giving the fabric a delicate feel. Fibre with silver ions has antibacterial properties, reduces the risk of fungal infections and prevents the unpleasant smell of sweat.

COMPOSITION: 95% polyester, 5% elastane

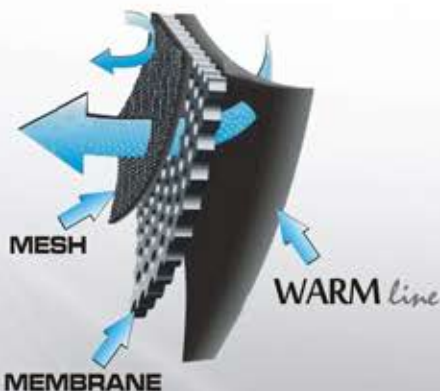

WEIGHT: 160g/m²

DESCRIPTION: Moisture transport, Quickly dry, Easy care, Perfect Fit, Shape retention.

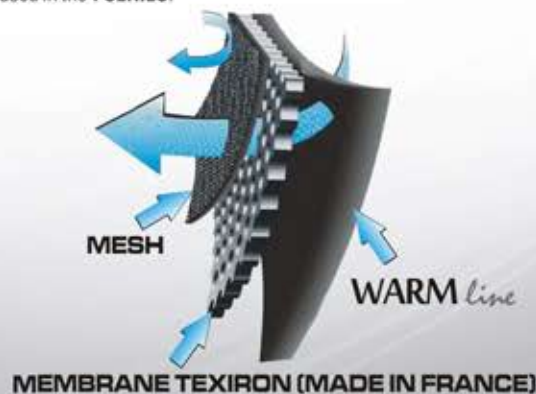

Wind Fighters

Trilaminate - provides comfort during use. The outer layer is a flexible mesh providing breathability. The middle layer provides protection from the wind. The inner layer is made of soft and durable fabric THERMOline providing thermal insulation and the rapid dispersion of moisture produced during physical activity. It is used in the S SERIES and M SERIES.

Wind Stop

Trilaminate - the product provides maximum comfort and ease of use in even the most extreme conditions. The outer elastic layer with a water-resistant finish ensures adequate breathability. The middle layer is a waterproof breathable membrane TEXIRON EXD 92M (Made in France) which also protects against wind. The inner layer is made of soft and durable fabric WARMline providing thermal insulation and the rapid dispersion of moisture produced during physical activity. It is used in the T SERIES.
